## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Gasky (Reg. No. 37139) on 12/10/2004.

## CLAIMS:

Claim 1, line 4: delete "air".

Claim 1, line 5: after "signal", insert --, indicative of airflow, --.

Claim 9,line 2: after "from", delete "an", and insert -- a single--.

2. Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 9, prior art, Tashiro et al. (U.S. Patent 2002/0038647), discloses an automotive integrated control system where the air and engine speed are used to determine the throttle position. Prior art Fuesser et al. (U.S. Patent 6,688,422) discloses a method and apparatus for actively influencing the intake noise of an internal combustion engine. Prior art, Tomisawa et al. (U.S. Patent 5,850,458) discloses an apparatus and method for actively reducing noise in vehicular passengers compartment. Prior art, Tamamura et al. (U.S. Patent 5,485,523) discloses an active noise reduction system for automobile compartment. Generally, regarding this subject matter, the prior art discloses using engine speed and/or throttle position to estimate air pressure not using an air flow signal to estimate engine speed and throttle position as claimed.

Art Unit: 2644

Additionally, there is usually more than one sensor used. The prior art does not in any way disclose using a single pressure sensor indicative of airflow to determine an engine speed and throttle position. As such, the prior art fails to disclose or make obvious the active noise control system and method of controlling an active noise control system as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Devona E. Faulk whose telephone number is 703-305-4359. The examiner can normally be reached on 8 am - 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Forester W. Isen can be reached on 703-305-4386. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
